Yerkey Named AeroTorque President

SHARON CENTER, OH - EBO Group announces that Ryan Yerkey has been named president of its subsidiary, AeroTorque. AeroTorque Corp., is a U.S. manufacturing and engineering firm which designs torsional control products and torque monitoring for wind turbines.

Yerkey joined EBO Group in 2006 as materials manager over consolidated production and purchasing functions. In 2009, he was promoted to Chief Operating Officer of TransMotion Medical to spearhead operational excellence and strategic planning initiatives to elevate the core processes and drive presence in the healthcare market. He became president in 2012.

“It is an honor to join the existing AeroTorque team who are devoted to extending our customers’ turbine life,” Yerkey said. “Our ultimate goal is to drive down our customers O&M cost and make wind energy an even more viable global energy source. AeroTorque has been on the leading edge to protect turbines from the quiet destruction caused by transient events. This expansion of our team is due to the widespread market acceptance with the technical solutions we are providing.”

Prior to joining EBO Group, Inc., Ryan served in a variety of operational positions at Swagelok. He is a graduate of the University of Dayton with a Manufacturing Engineering Technology degree and an MBA from Cleveland State University.

About AeroTorque

AeroTorque is a subsidiary of EBO Group, a 100% employee-owned company. Visit www.aerotorque.com to learn more.

About EBO GROUP

EBO Group, Inc., or Excellence By Owners, is a 100% employee-owned company, and is the umbrella organization to its fully-owned subsidiaries. The unique ownership culture encourages innovation, collaboration, and the incubation of new ideas, processes and products. The EBO Group companies include PT Tech (Brakes, Clutches, Torque Limiters & Controls for Extreme Machines around the globe) and AeroTorque (Torsional Control Products & Torque Monitoring for the Wind Turbine Industry).
